```
Tenth Avenue North
Key = G
Tempo 96
Intro : G Em C
Verse 1:
       G
So you thought you had to keep this up
All the work that you do so we think that you're good
And you can't believe it's not enough
All the walls you built up are just glass on the outside
Pre-chorus:
G/B
               C
   So let them fall down
        G/B
                        C
There's freedom waiting in the sound
                        C
When you let your walls fall to the ground
           G/B C D
We're here now
Chorus:
\mathsf{Em}
                  C
This is where the healing begins
```

```
Em
                   C
                           G

         \mathsf{Em}
                                         G
When you come to where you're broken within
                     Em
                         C G
The light meets the dark
                     Em
The light meets the dark
Interlude 1 : G
Verse 2:
 G
Afraid to let your secrets out
     \mathsf{Em}
Everything that you hide could come crashing through the door now
But too scared to face all your fear
       Em
So you hide but you find that the shame won't disappear
Pre-chorus
Chorus

Am7
               G/B
   Sparks will fly as grace collides
With the dark inside of us
